START/STOP EXISTING BACKUP JOBS

Locate the job you wish to modify at **Dashboard > Backup** and choose its configuration icon (pencil). You can get detailed information on a job or choose delete/enable/disable.

If you disable a scheduled job, it will not run until it is enabled again.

STARTING/STOPPING JOBS

Start and stop icons appear on the far right of the backup jobs table:

- Start a job: Choose the triangular play icon.
- Stop a job that is in progress: Choose the square stop icon.
