

CABLES AND CONNECTORS

THUNDERBOLT

Your LaCie product features Thunderbolt technology, the most flexible interface ever created. This exciting new high-speed cable technology connects your computers and electronic devices together like never before. Thunderbolt technology supports two 10Gb/s bi-directional channels from a single port, the fastest data connection available on a personal computer. At 10Gb/s, a full-length HD movie can be transferred in less than 30 seconds.

Thanks to support for both data streams and mini DisplayPort video, you can connect either a storage peripheral or a display to a Thunderbolt port. However, it's not possible to use a mini DisplayPort cable to connect a storage peripheral to a Thunderbolt port. You must use a Thunderbolt cable.

For more information, see www.lacie.com

CABLE MANAGEMENT

This product includes a cable lock, a small plastic clasp that prevents cords from accidentally disconnecting.

Important Info: It's impossible to disconnect the cable lock without destroying it.

To use the cable lock:

1. Insert the clasp's locking head into the lock slot.
2. Make sure that the interface cable is connected to the product.
3. String the interface cable through the open cable lock gate.
4. Close and snap in place the cable lock gate.
