

INTRODUCTION

Welcome to the User Manual for the LaCie d2 Blu-ray XL. The d2 Blu-ray XL is ideal for recording and playing large format HD video. A standard two-hour HD video (AVCHD) requires a minimum of 23.7GB, exceeding the limits of conventional optical disks. With support for BD XL discs up to 128GB, the d2 Blu-ray XL is a great solution for professionals and enthusiasts who wish to record their high-end projects and archive data.

This manual will guide you through the process of connecting your LaCie product and explain its features. If you have questions, please consult the [Getting Help](#) page.

BOX CONTENT

Your box contains the following:

- LaCie d2 Blu-ray XL
- USB 2.0 cable
- FireWire 400 cable (6-pin to 6-pin)
- FireWire 400 to 800 (6-pin to 9-pin)
- Power supply
- LaCie Software Utilities DVD-ROM (with the User Manual)
- Quick Install Guide (printed on the accessory box)

Important info: Please save your packaging. In the event that the optical drive should need to be repaired or serviced, it must be returned in its original packaging.

MINIMUM SYSTEM REQUIREMENTS

Your system must meet certain requirements in order for your LaCie product to function properly. For a list of these requirements, please refer to the product packaging or consult the product support web page at www.lacie.com/support/.
