# **GETTING CONNECTED**

**Caution:** Do not stack multiple LaCie Porsche Design Slim Drives, as they may overheat.

Installing your LaCie hard drive is easy for all users thanks to LaCie Setup Assistant. Please follow the setup steps in the order they are given to ensure that your LaCie hard drive's volume mounts correctly on your computer.

## STEP 1 - CONNECT THE USB CABLE

1. Connect the USB cable from the drive to the computer.

2. The drive will mount on your computer.

**Technical note:** If the USB bus on your computer does not provide the necessary power to operate your LaCie device, you may require a USB-Y cable, which can be purchased from <u>www.lacie.com/accessories</u>. See <u>USB-Y Cable</u> for details.

Note: If the drive does not mount on your computer, see troubleshooting topics at Getting Help.

## STEP 2 - LAUNCH LACIE SETUP ASSISTANT

LaCie Setup Assistant (LSA) must be launched before using your drive. It will allow you to:

- Easily format the hard drive according to your needs
- Copy the User Manual to your computer
- Install software for added features
- Register your LaCie device

**Important info:** If you do not launch LSA or if you quit it after the formatting has begun, your drive will not be ready to use and will require manual formatting. The User Manual and utilities will not be available and will have to be downloaded from the LaCie website: <a href="http://www.lacie.com/support/">www.lacie.com/support/</a>.

### Launch LaCie Setup Assistant

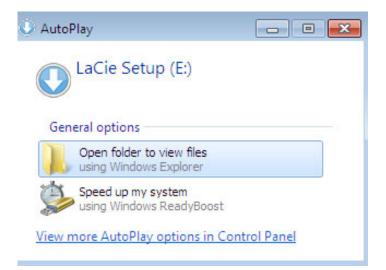

### Mac users

Open the LACIE SETUP volume on your desktop and then double-click LaCie Setup

### Windows users

AutoPlay: Windows AutoPlay may detect your LaCie hard drive as soon as it is connected to your computer. If the AutoPlay window appears, choose on **Open folder to view files using Windows Explorer** and double-click **LaCie Setup**.

Manual access: Open the **LACIE SETUP** volume in **Computer** (**My Computer** for Windows XP) and double-click **LaCie Setup**.

### Setup

LaCie Setup Assistant does not prevent you from using your computer's native disk utility program to format or partition your LaCie drive. Simply follow the Setup Assistant through completion, then use Disk Utility for Mac or Disk Management for Windows to reformat your drive.

**Important info for Mac users:** You may be prompted to enter your computer password to continue with LaCie Setup Assistant.

**Important info for Windows users:** While running LaCie Setup Assistant, generic pop-up windows may ask if you wish to change your computer's settings. This is a normal request when formatting a disk or installing certain software, such as Genie Timeline. To successfully complete LaCie Setup Assistant, LaCie recommends that you agree to change the settings.

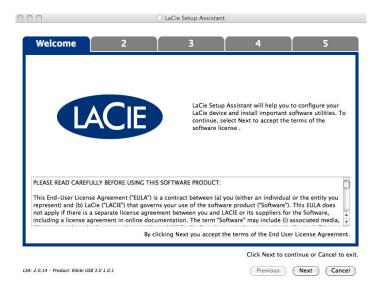

Follow the on-screen instructions as listed below to format your drive and install software utilities:

1. Select your language.

2. Please read the license agreement before choosing **Next**. Selecting **Next** confirms that you accept the license agreement.

3. Use the slider to partition your LaCie hard drive. Moving the slider to the left will reduce the size of the **Compatible** volume (called **LaCie Share** on some products) (for Windows and Mac). If you do not want the **Compatible** / **LaCie Share** volume, move the slider all the way to the left. The LaCie volume will be formatted for your operating system, HFS+ for Mac or NTFS for Windows. Once you have made your selection, choose **Next** to begin the format.

### **Existing Account**

- Choose the software utilities that you want to install. Please note that certain software utilities may begin to install before LaCie Setup Assistant has finished. Follow the software utility installer before completing LaCie Setup Assistant.
- 8. Choose **Next** to continue.
- 9. LaCie Setup Assistant provides a summary of the installation. Choose **Finish** to close the program. Your LaCie hard drive is now ready for use.

Software will be installed on the product's storage, not on your computer. It will be located on the volume entitled "Compatible" or "LaCie Share" if it exists, otherwise on "LaCie".

LaCie software utilities may be installed at any time. Once the format is complete, the LaCie Setup Assistant application will be available on:

- LaCie: if you created one partition
- Compatible/LaCie Share: if you created two partitions

To install the software utilities, simply launch LaCie Setup Assistant and follow the steps listed above.

## STEP 3 - INSTALL LACIE DESKTOP MANAGER (OPTIONAL)

Install LaCie Desktop Manager in order to manage your hard drive's advanced features. See <u>LaCie Desktop</u> <u>Manager</u> for more details.
