

GETTING CONNECTED

Installing your LaCie hard drive is easy for all users thanks to LaCie Setup Assistant. Please follow the setup steps in the order they are given to ensure that your LaCie hard drive's volume mounts correctly on your computer.

STEP 1: CONNECT THE INTERFACE CABLE

Connect the interface cable from the drive to the computer. The drive will then mount on your computer.

USB 3.0:

Technical note:

USB connection: If the USB bus on your computer does not provide the necessary power to operate your LaCie device, you may require a USB power-sharing cable. Depending upon your LaCie device, please connect a USB power cable or a USB-Y cable for additional power. If the cable is not included, you may purchase one from www.lacie.com/accessories.

Alternatively, you can connect the drive to a powered FireWire port on your computer in order to provide sufficient power. The FireWire connection can be in place of, or in addition to, the USB connection.

FireWire 800:

Technical note:

FireWire Connection:

The FireWire port on your computer must be powered to operate your LaCie device properly. Additionally, daisy chaining multiple non-powered FireWire devices may effect individual performance. To guarantee optimal performance, LaCie recommends daisy chaining *powered* FireWire devices to your LaCie hard drive.

FireWire 800 is backwards-compatible with FireWire 400, which means that if you have an adapter cable, you can connect your LaCie FireWire 800 product to a FireWire 400 port on your computer. In this case, file transfers will be limited to FireWire 400 speeds. If your product does not include an adapter cable in the package, you can purchase one from www.lacie.com/accessories/.

STEP 2: LAUNCH LACIE SETUP ASSISTANT

LaCie Setup Assistant (LSA) must be launched before using your drive. It will allow you to:

- Easily format the hard drive according to your needs
- Copy the User Manual to your computer
- Install software for added features
- Register your LaCie device

Important info: If you do not launch LSA or if you quit it after the formatting has begun, your drive will not be ready to use and will require manual formatting. The User Manual and utilities will not be available and will have to be downloaded from the LaCie website: www.lacie.com/support/.

Launch LaCie Setup Assistant

Windows users

AutoPlay: Windows AutoPlay may detect your LaCie hard drive as soon as it is connected to your computer. If the AutoPlay window appears, choose **Open folder to view files using Windows Explorer** and double-click **LaCie Setup**.

Manual access: Open the **LACIE SETUP** volume in **Computer (My Computer** for Windows XP) and double-click **LaCie Setup**.

Mac users

Open the **LACIE SETUP** volume on your desktop and then double-click **LaCie Setup**

Setup

LaCie Setup Assistant does not prevent you from using your computer's native disk utility program to format or partition your LaCie drive. Simply follow the Setup Assistant through completion, then use Disk Management for Windows or Disk Utility for Mac to reformat your drive.

Important info for Windows users: While running LaCie Setup Assistant, generic pop-up windows may ask if you wish to change your computer's settings. This is a normal request when formatting a disk or installing certain software, such as Genie Timeline. To successfully complete LaCie Setup Assistant, LaCie recommends that you agree to change the settings.

Important info for Mac users: You may be prompted to enter your computer password to continue with LaCie Setup Assistant.

Follow the on-screen instructions as listed below to format your drive and install software utilities:

1. Select your language.

2. Read the license agreement before choosing **Next**. Selecting **Next** confirms that you accept the license agreement.

- Use the slider to partition your LaCie hard drive. Moving the slider to the left will reduce the size of the **Compatible** volume (called **LaCie Share** on some products) (for Windows and Mac). If you do not want the **Compatible** / **LaCie Share** volume, move the slider all the way to the left. The LaCie volume will be formatted for your operating system, NTFS for Windows and HFS+ for Mac. Once you have made your selection, choose **Next** to begin the format.

Windows

Mac

4. A window prompt alerts you that the disk will be formatted. Select **Yes** to continue.

Windows

Mac

5. LaCie Setup Assistant will format the hard drive.

6. Register your LaCie device. Choose **Next** to continue.

New Account

Existing Account

7. Choose the software utilities that you want to install. Certain software utilities may begin to install before LaCie Setup Assistant has finished. Follow the software utility installer before completing LaCie Setup Assistant.
8. Choose **Next** to continue.
9. LaCie Setup Assistant provides a summary of the installation. Choose **Finish** to close the program. Your LaCie hard drive is now ready for use.

Software will be installed on the product's storage, not on your computer. It will be located on the volume entitled "Compatible" or "LaCie Share" if it exists, otherwise on "LaCie".

LaCie software utilities may be installed at any time. Once the format is complete, the LaCie Setup Assistant application will be available on:

- LaCie: if you created one partition
- Compatible/LaCie Share: if you created two partitions

To install the software utilities, simply launch LaCie Setup Assistant and follow the steps listed above.
